Dental System Review

1 per month training

Innovation never stops at 3Shape, and 3Shape Dental System enables the widest range of treatment workflows and provides the largest suite of digital tools and libraries. Users get integrated and intuitive workflows, value-packed care programs, and an open ecosystem that freely lets you combine equipment, materials, and 3rd party services so that you can take advantage of all that digital dentistry has to offer.

This is why it's so important to know your digital tools and be able to use them in 100% of daily use. During a one-day course, you will learn what's new in latest 3Shape update based on the knowledge completed on Dental System Basic and Advanced training agenda.

Upon completion of the course, you will be able to:

- Effectively design Crown and Bridge using all new Dental System core functionalities;
- Get the full understanding of the implant workflow starting from the libraries import and abutment design;
- Design Implant bar and bridges;
- Generate implant model with separate soft-tissue file;
- Use 3Shape Communicate effectively.

Target group: 3Shape users who completed Dental System Basic and Advanced training.
Number of participants: maximum number of participants is 8.
Frequency: 1–2 per month.
Course price: *Please contact us for the price*
Time: 10:00 – 16:00.
Certificate: a CPD approved certificate will be issued upon completion of the training.
Location: Reading, UK
Trainer: Michal Kawczynski, Training & Application Specialist at 3Shape UK.
